## Projects

OHANA SPORTS LLC, SEATTLE

JANUARY 2024-PRESENT

### Full Stack Web Developer

- 1 of 2 developers to create Ohanasportsllc.com from scratch.
- Weekly meetings with site Owner to go over requirements for the site
- Contributed to transition of static site, to dynamic, with collaboration from other dev to connect the backend functions to Contact form, and Scoring/Standings displays, league creation etc.

Built using: React, styled-components, Azure functions, mongoDB, React Hook Forms, Yup, Git, Github Organizations,

MAPTY , SEATTLE

DECEMBER 2023-JANUARY 2024

### Front-end Web Developer

- Built a web app to enter, display, and track workouts on a map
- Built features such as Create, Edit, Delete and save workouts (using local storage)
- Built weather display API for current weather in your location (required to display map, weather), can toggle between F | C based on preference
- Used Classes to design application: App, Workout, Running, Cycling, Weather

Built using: HTML, CSS, Vanilla Javascript, Leaflet

PHILCAMP, SEATTLE

JUNE2023-SEPTEMBER 2023

### Full Stack Web Developer

- Built a Yelp like application to create, read, update and destroy campgrounds, and display them on a global cluster map
- Built review system schema to ref user schema for users to review campgrounds they enjoy
- Built authentication, authorization using Passport js, and implemented auth middleware on created routes handling
- Connected and successfully launched site using OnRender
- Easily the most challenging project to date, offering challenges on many fronts. adapting the campground map, based on user input location, authorization using passport js (which is still difficult for me), and getting the update put request to work, using mongoose's js syntax to name a few.

Built using: Bootstrap, EJS, Vanilla Javascript, Express, Passport JS, Cloudinary, MongoDB, Mongoose, Helmet.js, Mapboxgl

---

## Professional Experience

META PLATFORMS (FORMERLY FACEBOOK), LONDON

JANUARY 2022-JUNE 2023

### Senior Technical Recruiter, General Software Engineering

- Supported senior level hiring of software engineers across Europe, Middle East, and Africa
- Provided 6 week in-depth training for the wider org for 30+ recruiters for senior hiring practices, including technology training, candidate engagement, shadow calls, shadow reviews, and how to interpret coding, design and behavioral feedback for best hiring practices
- Mentored 7 recruiters; 7/7 meeting or exceeding their goals during their tenure
- Partner with new multiple recruiting managers to help onboard to Meta, partner with recruiting team and show best practices

META PLATFORMS (FORMERLY FACEBOOK), SEATTLE

JANUARY 2020-DECEMBER 2021

### Senior Technical Recruiter, ETR,

- Supported hiring of E4/E5 software engineers across Seattle, Menlo Park, New York, Los Angeles, Boston and Washington DC
- 1 of 5 core members to train, developer and grow team from 5 to 60+ in 2021
- Supported product, systems and Android pipelines
- Lead and created closing process for Android ETR, as well as partnered with intern team to plan and build their process
- Achieved ~300% of goal in H1, 2021

FACEBOOK, SEATTLE

FEBRUARY 2018-2020

### Technical Sourcer, General Software Engineering

- Sourcing for senior level product and infrastructure engineers for Seattle
- Mentored multiple Sourcers, formally and informally
- Held site trainings for response rates and funnel metrics, as well as LinkedIn sourcer training
- Data POC for immediate team to discuss metrics for progress to goal in weekly site meetings
- Completed “Sourcer to Closer” program with recommendations to move into role from lead. Closed (and sourced) my first diversity candidate in H2, 2019
- Leverage data reports to guide current hiring practices and influence future sourcing strategies

AMAZON, SEATTLE

AUGUST 2016-2018

### Technical Recruiter, Delivery Experience

- Recruit senior level software engineers, technical program managers and software development managers using various sourcing strategies
- Lead sourcing efforts for two international events: Mexico (24-candidate event) and South Korea (48-person event). Also participated in sourcing events in Germany and Austria
- Hosted/conducted multiple cross organization sourcing trainings for our main sourcing/recruiting platform
- Conduct intake meetings with engineering managers to provide the right interview processes and ensure we are understanding our technology and hiring needs
- Improved interview calibration of engineers through data reports, comparing correlation of incline votes to offer ratios
- Leverage data reports to guide current hiring practices and influence future sourcing strategies

FLEXASOFT, REDMOND

2015-2016

### Technical Recruiter

- Managed and maintained all hiring needs and client relationships for our video game test branch
